

YASH SANTOSH CHAUDHARI

Python Developer | Healthcare SaaS Developer | AI Automation Engineer

Email: yashchaudhari5055@gmail.com

PROFESSIONAL SUMMARY

Software developer with experience building healthcare SaaS platforms, AI-assisted business solutions, and engineering automation systems. Background combines software development, healthcare workflows, AI tooling, and CAD/CAM manufacturing expertise.

TECHNICAL SKILLS

Programming:

Python, PHP, JavaScript, REST APIs, MySQL, Automation Scripts

Web Development:

HTML, CSS, Bootstrap, Authentication Systems, Database Integration, Responsive Web Applications

AI & Development Tools:

Claude Code, ChatGPT, GitHub Copilot, Gemini API, AI-assisted Development Workflows

Testing & Security:

Playwright Testing, Debugging, Security Reviews, Authentication & Authorization Testing

Engineering:

Fusion 360, AutoCAD, CAD/CAM, CNC Programming, VMC Manufacturing

EXPERIENCE

Software Developer

DocTecq Technology | May 2025 - Present

- Working on healthcare SaaS platforms for clinics and hospitals.
- Developed and improved modules for doctor, patient, receptionist, admin and super admin workflows.
- Worked on appointment systems, patient management, prescriptions and dashboard features.
- Improved UI/UX, debugging workflow and production readiness.
- Used AI-assisted development tools with manual testing and code review practices.

Design / CAD CAM Engineer & Technical Trainer

Climax Engineering Works | Nov 2023 - May 2025

- Designed aluminium extrusion dies using AutoCAD and Fusion 360.
- Created CAD models and manufacturing workflows for CNC/VMC operations.
- Worked on machining strategies and production improvement.
- Trained employees in CAD design workflows, Fusion 360 and manufacturing practices.

PROJECTS

Kogmed - Enterprise Healthcare Management Platform

Healthcare SaaS ecosystem for hospitals and clinics.

Features:

- Multi-role system: Super Admin, Admin, Doctor, Reception, Patient
- Appointment booking and scheduling
- Patient portal and profile management
- Prescription workflow
- Billing and healthcare operations modules
- Database-driven architecture
- Security improvements and testing

DocTecq PMS - Clinic Management Platform

- Multi-clinic management system
- Patient records and appointment workflows
- Treatment and clinical management modules
- Reporting and operational dashboards

CAD/CAM Automation Platform

- Automation system for aluminium extrusion die manufacturing.
- Focused on CAD analysis, toolpath assistance and reducing manual CNC programming effort.

AI Portfolio Assistant

- Python CLI tool using AI APIs for generating professional documents and content.

Web Scraper Automation

- Automated extraction system using Python, BeautifulSoup and Requests.

EDUCATION

B.Tech Computer Science & Engineering
Parul University, Vadodara

KEY STRENGTHS

- Healthcare software development
- AI-assisted engineering workflows
- Problem solving across software and manufacturing domains
- Fast learning and real-world implementation ability
